

# TensION

Product quality, output and yield of manufacturing processes can be improved considerably when problems related to static electricity are identified and dealt with effectively. Electrostatic fieldmeters are appropriate measuring tools to simply identify static electricity problems.

The TensION static system checker enables you to check all kind of ionising and charging equipment. Without making contact with the actual equipment it gives you an easy and safe way to check if a high voltage is present. The tip of the TensION illuminates when a voltage is present. When a high voltage is present the minimal requirement for operation of the equipment is provided.

**Technical specifications**

Range	3 - 30 kV
Measuring distance	3,3 kV - 5 mm, 4kV - 6mm 5 kV - 10 mm, 7 kV - 13mm 10 kV - 20 mm, 30 kV - 80mm
Display	LED indication
Battery	2x AAA 1,5 V
Case	Radilon-S HS (a)
Weight	0,004 kg
Ambient temperature	-10°C +55°C
